Join our mailing list for upcoming Webinars and Newsletters

What you will learn today:

- What are Intravenous Therapies?
- How & Why IV Therapies work.
- How they can **improve** your condition.
- Who can **benefit** from them and why.
- A list of available IV Therapies.

CERTIFICATE OF PROMISE TO YOU

I, DR. KERI TOPOUZIAN PROMISE TO SHARE WITH YOU HOW I HAVE SUCCESSFULLY TREATED HUNDREDS OF PATIENTS WITH VARIOUS IV THERAPIES OVER THE PAST TEN YEARS.

I PROMISE THAT BY THE END OF THIS WEBINAR-JAM SESSION YOU WILL UNDERSTAND THE BENEFITS OF IV THERAPIES AND BE ABLE TO DECIDE IF IV THERAPIES ARE RIGHT FOR YOU.

AND FINALLY, I PROMISE THAT WITH IMPROVED HEALTH, YOU WILL HAVE AN IMPROVED SENSE OF WELL BEING, A BETTER ABILITY TO FUNCTION ON A DAY TO DAY BASIS, & THE ABILITY TO ENJOY LIFE.

Keri Topouzian DO

Q&A at the end

- Email me at askdrt@gmail.com
 - Type: “WebQ” in subject line

Why I am Presenting this Webinar?

- I now understand on a cellular basis why these treatments work.
- Because I have seen how IV Therapies have helped **accelerate** the healing process.
- Many people just do not know about these therapies.
- Through trial and error, I have learned what works and what doesn't.

Credentials

- Doctor of Osteopathic Medicine University of Health Sciences Kansas City, MO
- 31 years clinical experience
- Board Certified in Emergency Medicine
- Board Certified in Anti-Aging Functional Medicine
- Michigan State University, College of Osteopathic Medicine, Clinical Assistant Professor.
- TV series “Ask Dr. T” Winner of the 2007 Philo T. Farnsworth Video Competition

-
- In 1994 I found myself in a situation where I had to find answers - viable alternatives to treat one of my kids.
 - Snowballed.

After experiencing a diverse and troubling set of symptoms, Dr. Topouzian has used a multi-pronged approach to my treatment plan... Included in this plan are high dose vitamin C infusions and HCL.

Prior to treatment, I was operating at about 30%. With treatment , I am at about 75% and am hoping to improve with time. Due to my compromised immune system, I choose to avoid vaccinations. As such, my own immune system must be boosted to help me fight infections, such as the flu. Infusions have definitely helped...

The infusion clinic has a friendly atmosphere, under the guidance of Dr. T and his infusion specialist, Luis. He is an expert at locating veins, inserting the catheter or butterfly and performing blood draws and infusions.

I highly recommend taking advantage of the services offered at Dr. Ts infusion clinic. Cathy S.

- When I first came to Dr. T with in my depleted state, he told me I was not absorbing my nutrients which turned out to be the underlying cause of my pain, fatigue, brain fog and hair loss.
- Under Dr. T's supervision, I have had IV treatments of vitamins and minerals that have improved my condition. At the same time he has helped my digestive system and absorption.
- Dr. T took a different approach to trying to find the cause of my problems and performed a lot of testing. Other doctors that I had seen did not have any answers for me other than prescriptions. Jessica. J.

Ten years ago I was diagnosed with Fibromyalgia and Chronic Fatigue Syndrome and I was put on a slew of different medications. Some helped for awhile, others had side effects that were worse.

Dr. Topouzian found that I have low thyroid, low testosterone and low cortisol levels. A treatment plan was put together that included Myers Cocktail IVs and Glutathione. I could tell that I needed these treatments by the way my body responded. Intense treatment for an intense problem.

I still occasionally come in for an IV treatment if I feel a cold coming on or if I am under a lot of stress. Taylor M.

What I did Wrong...

- I simply knew nothing about IV Therapies (it's not something they teach you in medical school)
- I knew other physicians were utilizing these types of therapies but I kept putting off learning about them.

*Success in life is the
result of good judgement
Good judgement is the
result of experience
Experience is the result of
bad judgement*

Eureka Moment...

- Then out of the blue... I took over *Chronic Fatigue & Fibromyalgia Clinics of America* - Michigan Office and inherited hundreds of patients that were getting IV therapies.
- I saw how these therapies were helping patients and then I figured out why...
- Nutrients can't always get into the body for a number of reasons.
- I learned about the extracellular matrix and learned why and how IV Therapies work.

Intro to IV Therapies?

- **Many chronic illnesses and conditions stem from your body's INABILITY to absorb and utilize nutrients that are required to sustain the health of every individual cell in your body... *the entrance door is closed and nothing can get in.***
- **On the back side, this means that your body is also unable to get rid of all the byproducts, "leftovers" & toxins... *the exits are closed as well.***
- ***Intravenous therapies bypass the above blockades and help with their removal by strengthening all of your body's cells and enhancing your detoxification organs.***

What are IV Therapies?

- Therapies that are delivered directly into the vein.
- Raise your hand if you like needles... ***No one does!*** But the key is having someone that knows what they are doing and has a lot of experience.

List of IV Therapies

Myer's Cocktail

HCL

Chelation

Glutathione

Alpha Lipoic Acid

Ascorbic Acid (aka Vitamin C)

Magnesium

Silver

GPC

Iron

PolyMVA

Why Do IV Therapies Work?

- High concentration into the tissues over a short period of time causing a **supersaturation** of specific substances with a **more profound effect**.
 - *The same reason IV medications work better than by mouth.*
- Many patients have malabsorption of nutrients, vitamins, minerals & amino acids and the only way to get the needed nutrition to heal the body is through IV therapies.
 - GERD medications, low acid production, low enzyme production, adrenal fatigue, leaky gut, gallbladder issues or lack of a gallbladder, gut infections, dysbiosis, poor diet, etc.

How Can IV Therapies Improve your Condition?

- Delivering required nutrients directly to your cells for **improved function**.
- Creating a **specific metabolic effect**.
 - Example: HCL increases white blood cell production.
- Neutralize and remove **toxins**.
 - Example: Chelation, Ascorbic Acid.
- Help **heal** specific organs.
 - Example: Lipoic acid & the liver.
- **Kill** blood born pathogens (viruses, parasites, bacteria).
 - Example: Silver
- Cross the blood brain barrier to **improve** cognition
 - Example: Glutathione, GPC, PC
- Effectively **replace** missing nutrients.
 - Example: Myers Cocktail
- **Heal** Adrenal Fatigue
 - Example: Myers Cocktail

Who can benefit from IV Therapies

1. Patients with any chronic condition.
2. Autoimmune disease.
3. Symptoms that do not improve with conventional treatments.
4. Chronic infections from viruses, parasites, molds or bacteria.
5. Heavy metal exposure (mercury, lead, arsenic, cadmium, aluminum).
6. Cognitive issues (brain fog, memory loss, dementia).
7. Fibromyalgia & Chronic Fatigue Syndrome.
8. Gut issues and poor absorption of nutrients.

Who can benefit from IV Therapies Cont'd

1. Chronic pain syndromes
2. Lyme disease
3. Liver disease
4. Cancer
5. Iron deficiency anemia
6. Asthma
7. Chronic headaches and migraines
8. Opiate withdrawal
9. Angina

Who can benefit from IV Therapies Cont'd

- 1. Muscle Spasms, Charlie horses**
- 2. Seasonal Allergies**
- 3. Depression**
- 4. Upper Respiratory Infection, Influenza**
- 5. Dehydration**
- 6. Aides**
- 7. Parkinson's disease**
- 8. Macular Degeneration**

Who can benefit from IV Therapies Cont'd

1. High blood pressure
2. PMS
3. Rheumatoid arthritis
4. Enhance athletic performance

IV Therapies

Myer's Cocktail

HCL

Chelation

Glutathione

Alpha Lipoic Acid

Ascorbic Acid (aka Vitamin C)

Magnesium

Silver

GPC

Iron

PolyMVA

Myers Cocktail

Main Ingredients:

- ✓ Magnesium
- ✓ Calcium
- ✓ Carnitine
- ✓ Methy B12
- ✓ B6
- ✓ B5
- ✓ B Complex
- ✓ Vitamin C
- ✓ Glutathione

Malabsorption	Brain Fog
Asthma	Fatigue
Migraines	Fibromyalgia
Depression	Upper Respiratory Infections
Urticaria (chronic hives)	Athletic Performance
Seasonal Allergies	PMS
Muscle Cramps	Anxiety
Acute Infections; Colds Flu	Drug and Alcohol Withdrawal

Gaby IV Push (Myer's Cousin)

Infuses high concentrations of nutrients to quickly boost energy.

Similar to the longer Myers' Cocktail and was distilled down to around 25 cc's that can be pushed quickly for a "pick-me-up", to ward off an infection, a general health and immune booster.

Some patients will opt to do a series of 4-8 of these "Gaby's", as they are called for short, at 1-2 per week to get their health improving quickly. This can also be done with the longer, more powerful "Myers' Cocktail", if the patient needs a stronger version of this I.V. nutrition.

This quick IV push takes 10-20 minutes, depending on the patient, and contains: Vit C, B Complex, B5 (pantothenic acid), B6, B12, Magnesium, and Calcium.

Rapid mineral replacement (RMR) with a "GABY" IV push often has immediate health benefits for those suffering from:

- Early signs of upper respiratory infection or flu
- Asthma and other lung disorders
- Stress related disorders
- Depression, anxiety or acute stress
- Muscle soreness or spasm
- Headaches or migraines
- Seasonal allergies
- Chronic itching or hives
- Athletic performance
- Fatigue or exhaustion
- General sense of depletion

HCL

HCL = Hydrochloric Acid. Don't be alarmed. The amount used intravenously is a very small amount but way back in the 1930's before the advent of antibiotics, HCL was used in the treatment of all types of infections as well as the treatment of cancer.

HCL increases your body's **white blood cell** count thus enhancing your immune function. HCL is beneficial in the treatment of acute infections like:

1. Influenza
2. Strep infections
3. Pneumonia, Bronchitis

Chronic Infections like:

1. Lyme Disease and other coinfections
2. Viruses like CMV, Ebstein Barr, Herpes
3. Parasites
4. Yeast, Candida

Glutathione (GSH)

- Body's **main** antioxidant. **Protects and prevents damage** of cells in your body.
- **Most important molecule** you need to stay healthy and prevent disease.
- **Prevents** aging, cancer, heart disease, and dementia.
- Helps us reach peak **mental and physical function**.
- **Decrease** muscle damage, reduce recovery time, **increase** strength and endurance and shift metabolism from fat production to muscle development.
- 80,000 medical articles on GSH.
- Your body naturally produces glutathione but **poor diet, pollution, toxins, medications, stress, trauma, aging, infections and radiation** all deplete it which leaves you susceptible to oxidative stress, free radicals, infections and cancer. And your liver gets overloaded and damaged, making it unable to do its job of detoxification.

Diseases with Documented Links to **Low Glutathione**

Neuro and Brain

Alzheimer's Disease
Parkinson's Disease
Huntington's Disease
Amyotrophic Lateral Sclerosis
(ALS, or Lou Gehrig's Disease)
Migraines
Multiple Sclerosis (MS)
Autism
ADHD/ADD
Bipolar Disorder
Depression

Cardiovascular

Atherosclerosis
Angina
Erectile Dysfunction
Hypertension
Stroke

Immune and Cancer

HIV and AIDS
Cancer (Breast, Lung, Cervical,
Colon, Ovarian, Leukemia)
Lupus
Viral Infections
Asthma
Acne
Lyme Disease
Allergies
Gingivitis
Rheumatoid Arthritis

Thyroid and Pancreatic Function

Diabetes
Pancreatitis
Hyperthyroidism
Hypothyroidism

Other

Inflammatory Skin
Conditions
Accelerated Aging
Arthritis
Chronic Fatigue
Chronic Obstructive
Pulmonary Disease (COPD)
Gout
Hepatitis of Any Kind
Cystic Fibrosis
Infertility
Eyesight Issues (including
Macular Degeneration)
Gastric Ulcers

***If you are sick or old or are just
not in peak shape, you likely
have glutathione deficiency.***

Lipoic Acid

If you have any problems with your liver or detoxification, Alpha Lipoic Acid (ALA) is what you should be thinking about.

- *Elevated liver enzymes*
- *Liver Cancer*
- *Fatty Liver*
- *Poor Detoxification*

Ascorbic Acid (Vitamin c)

Boost Immune Function

Universal Antidote

Allergies

Hay-fever Detoxification

Potent antioxidant

Increase Resistance to Infection

Largely unknown role of vitamin C's ability—when administered in very high doses by intravenous (IV) infusions—to kill cancer cells. Vitamin C interacts with iron and other metals to create hydrogen peroxide. In high concentrations, hydrogen peroxide damages the DNA and mitochondria of cancer cells, shuts down their energy supply, and kills them outright. Best of all—and unlike virtually all conventional chemotherapy drugs that destroy cancer cells—it is selectively toxic. No matter how high the concentration, vitamin C does not harm healthy cells.

Why IV Administration Is Essential

The only way to get blood levels of vitamin C to the concentrations required to kill cancer cells is to administer it intravenously. The body tightly controls levels of this vitamin by limiting intestinal absorption.

IV vitamin C is not a cure-all for cancer. Vitamin C may also be used in conjunction with other alternative and conventional therapies—in fact, when given on the same day as chemo, the two have synergistic effects.

Glycerophosphatidylcholine (GPC)

- Improved **attention and word recall** in young, healthy people.
- Improved **cognition, mood, and behavior** in those with memory decline.
- Improved activities of daily living in patients with severe loss of mental capabilities. (Dementia, Alzheimer' Disease)
- Improved recovery from stroke.
- Aided recovery from traumatic brain injury.
- Partial revitalization of the aging human brain.
- Increase in **Human Growth Hormone** levels in the blood.

Silver

- Lyme Disease
- Any acute or chronic infection
- Kills MRSA
- Kills everything... except you.

Magnesium

- Migraines
- Muscle Spasms and Twitching
- Anxiety
- Depression
- Asthma
- Rapid Heart Beat

Chelation(kee-lay-shun)

Benefits:

Restore Vascular Health & Improve Blood Flow

Improve Heart Function / Angina

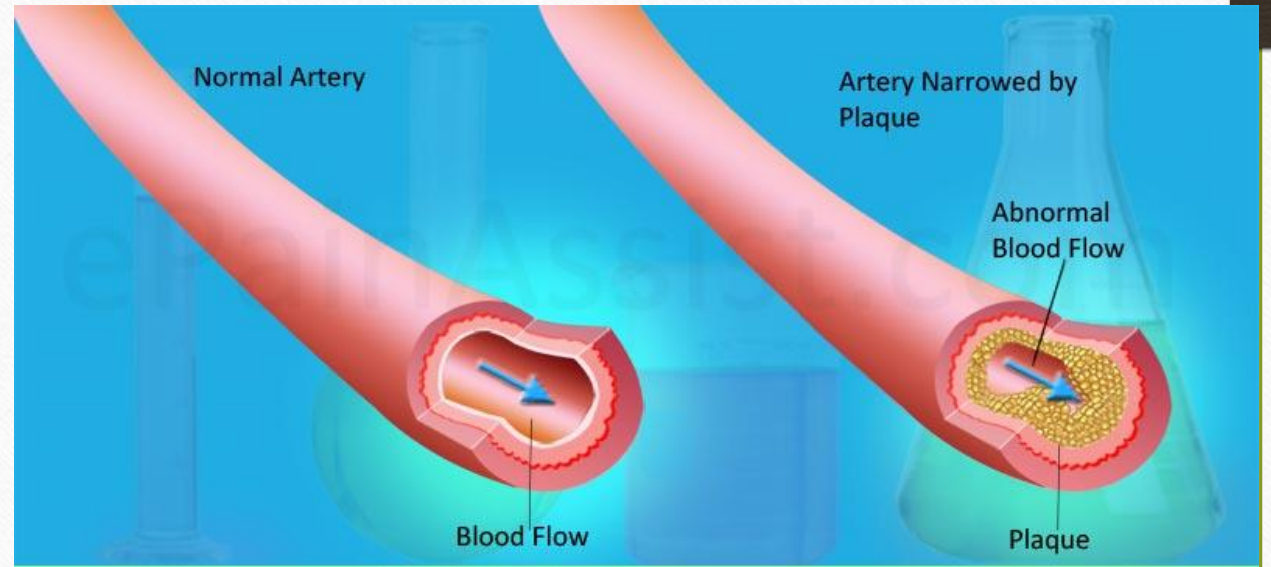

Improve Atherosclerosis

Improve Sexual Function

Improves Brain Function & Memory

Lowers Blood Pressure

All Neurological Conditions

Chelation (cont'd)

Chelation therapy is an intravenous treatment used to remove toxic metals from the body, such as:

Cadmium (soil, air, food, smoking)

Arsenic (wine, rice, chicken, water, environment)

Lead (Lipstick, hair coloring, paint, environment)

Mercury (dental fillings, fish, vaccines, environment)

Gadolinium (MRI contrast dye)

Antimony (fire retardant in clothes and bedding)

PolyMVA

- Enhances cellular DNA repair
- Antioxidant
- Used as an adjunct in the treatment of cancer.
- Typically taken by mouth but can be used intravenously.
 - Reference: Google Scholar

- S.L.T, a 51 year old female with history of hypothyroidism and addicted to Omeprazole.
- **Main complaints:** fatigue, hair loss, brain fog, vertical ridges on finger nails, food cravings, unable to lose weight.
- Blood testing showed elevated PTH, elevated rT3, low magnesium, low B12, and low GSH
- Diagnosis: Malabsorption
- Plan: IV Myers + GSH, wean off Omeprazole.

- M.K. a 48 year old female with history of angina, refusing to have an operation.
- Patient was given IV chelation treatments every week for 90 days. Angina subsided.

Determinants of Resistance to Flow (Poiseuille's Equation)

Three factors that determine the resistance to blood flow in a blood vessel:

1. **vessel diameter (most important)**
2. Vessel length
3. Viscosity of the blood

Very small changes in vessel diameter lead to large changes in resistance.

An increase in blood vessel diameter of 10% will DOUBLE the blood flow.

This is why chelation is so effective.

- M.G., a 56 year old female diagnosed with Fibromyalgia and Chronic Fatigue Syndrome. Everything she reads on the internet tell her that its her thyroid and adrenals and not Fibromyalgia. Her doctor refuses to test more than TSH but is more than happy to prescribe Zoloft or Celexa.
- Makes Skype appointment with DR.T and we go over her old labs and her TSH is elevated (greater than 3). More labs are performed and patient is placed on Naturethyroid and Bio-identical Hormones plus the DR.T3/5 Step Formula.
- “I felt like a cloud lifted from my brain.”

- L.M 53 year old female came into the hospital (while I was writing this webinar!) complaining of muscle twitching, muscle spasms, migraines and anxiety.
- Intravenous magnesium was started and symptoms resolved in one hour.
- After she left the hospital, she went to Kroger's to go buy magnesium.

WHY YOU ARE HERE

- Fix your condition and get your life back
- Feel Better & get rid of your symptoms
- Improve your health
- *Abuse My Experience*

What will your life be like a year from now even if you only get a fraction of these results?

If You Would Like to Schedule An IV Appointment...
